

Name: 500,000 Gallon Water Tank
Owner: City of Belvidere
Location: Belvidere, Illinois, USA
Products: Amercoat 68HS
Amerlock 400
PSX 700
Date: April - May, 2006

The City of Belvidere is located in north central Illinois, 75 miles from downtown Chicago. In April of 2006, the City contracted Chicago Bridge & Iron Works to build a new 500,000-gallon water storage tank.

After abrasive-blasting the tank's carbon steel interior and exterior surfaces, they received one coat of Amercoat 68HS zinc-rich epoxy primer, followed by one coat of Amerlock 400 high-solids epoxy and a final topcoat of our patented PSX 700 engineered siloxane.

PSX 700 is the world's first weatherable epoxy, and embodies the properties of both a high-performance epoxy and an acrylic polyurethane in one coat, offering excellent weather resistance and corrosion control.
