

Name: Country Inn & Suites
Owner: The Carlson Group
Location: Naperville, Illinois, USA
Products: Amerlock 400
Prep 88
PSX 700
Date: Fall of 2005

In the Fall of 2005, The Carlson Group, headquartered in Minnesota, needed to paint the distinct green roof flashing of its Country Inn & Suites in Naperville, IL. The project was awarded to contractor All-Tech of Lockport, IL and PPG PMC high-performance coatings were selected for the job.

After preparing the 7,500 sq.ft. Kynar flashing by chemical cleaning and a water wash, it was further cleaned using PPG PMC's Prep 88 water-based cleaner. It was then spot-primed with Amerlock 400 high-solids epoxy and topcoated with PPG PMC's patented PSX 700 engineered siloxane.

PSX 700 is the world's first weatherable epoxy. It embodies the properties of both a high-performance epoxy and an acrylic polyurethane in one coat and offers breakthrough weather resistance and corrosion control.
