**Location:** San Diego, California, USA  
**Surface Prep:** Power tools and hand tools  
**Products:** Amercoat 88  
PSX 700  
**Date:** May, 2004

**When the owners of a Jack in the Box drive-through restaurant in San Diego, California needed to paint its Kynar-coated aluminum roof, their selected contractor, BayCal Painting, chose PPG PMC coatings.**

**The 2,500 square foot roof was power- and hand-tool cleaned and then an initial coat was applied of Amercoat 88 (formerly Prep 88) water-based cleaner. The roof then received a topcoat of PPG PMC's patented PSX 700 engineered siloxane, giving it an attractive, glossy appearance.**
