

Name: M/V Night Hawk
Owner: Highhawk Inc.
Location: Amelia, Louisiana, USA
Surface Prep: SSPC-SP10
Products: Amercoat 235
PSX 700
Date: January, 2004

When owner/operator Nighthawk Inc. of Wall, New Jersey needed to repaint its charter fishing boat, the M/V “Night Hawk,” the vessel was drydocked at Tesco shipyard in Amelia, Louisiana.

From the waterline to the pilot house, a total of 3,000 square feet, the aluminum vessel was abrasive-blasted to SSPC-SP10 standard. One coat of Amercoat 235 multi-purpose epoxy was applied at 5 mils DFT, then topcoated with PPG PMC’s patented PSX 700 engineered polysiloxane at 4 mils DFT.

This coating system will provide the vessel long-lasting protection and gloss retention.
