

Name: Rocky Hill Water Standpipe
Owner: Metropolitan District Commission
Location: Rocky Hill, Connecticut, USA
Products: Amercoat 68HS
PSX 700
Date: October, 2005

In October of 2005, the Rocky Hill, CT Water Standpipe was scheduled for maintenance. The Rocky Hill Metropolitan District Commission awarded the project to painting contractor Marcel Payeur, who selected PPG PMC high-performance coatings to protect the 10,000 sq.ft. tank exterior.

After properly preparing the carbon steel surface, one coat of Amercoat 68HS zinc-rich epoxy primer was applied at 4 mils DFT, followed by two brushed/rolled finish coats of PPG PMC's patented PSX 700 engineered siloxane at 11-12 mils DFT each.
