

Name: Steel Floor
Owner: Joseph Joslyn
Location: Saratoga Springs, New York, USA
Products: PSX 700
Date: January, 2007

Joseph Joslyn is an emerging artist in the Saratoga Springs, New York area. His pieces can be viewed at local galleries and decorate several restaurants in the city, and one of his pieces placed "Best In Show" in July, 2007. He also manages the metal fabrication division of Bonacio Construction Company in Saratoga Springs.

Mr. Joslyn was commissioned to create a one-of-a-kind steel floor for a private residence in Saratoga Springs. The floor – made from steel panels laid in grid frame over radiant heated concrete and machined in patterns to achieve character – required a clear coating that would tolerate and accentuate the character in the steel and retain its gloss for years to come, despite heavy foot traffic.

PPG sales representatives Brian Myers and Tony Persutti recommended PPG's patented engineered siloxane PSX 700 Clear for the project, which was supplied to Mr. Joslyn through local dealer Allerdice Building Supply. Applied at 10 mils dry film thickness, PSX 700 will provide the floor outstanding gloss and wear resistance.
