

Name: Vopak Tank 604
Owner: Vopak Terminal
Location: Deer Park, Texas
Contractor: A&L Blasting and Painting
Products: Prep 88
PSX 700
Date: October, 2000

Vopak Terminal contracted with A&L Blasting and Painting in October, 2000 to perform routine maintenance on its crude oil storage Tank 604 in Deer Park, Texas.

Vopak uses PPG PMC coatings exclusively at its Deer Park and Galena Terminals, so after cleaning the carbon steel tank roof and shell – a total of 35,000 square feet – with PPG PMC's Prep 88 water-based cleaner, a full coat of PPG PMC's patented PSX 700 engineered siloxane was applied over the existing polyurethane.

At the four-year inspection in December of 2004, the finish was found to still be in excellent condition.
