

**Name:** Cedar Bluff Waste Water  
Processing Plants

**Owner:** Utilities Services, Inc.

**Location:** Dunlap, Illinois, USA

**Products:** Amercoat 370  
Amerlock 2

**Date:** July to December, 2006

In the summer of 2006, Utilities Services Inc. needed to perform maintenance at its Cedar Bluff Waste Water Processing Plants in Dunlap, Illinois, which had not been painted for 15 years. General Contractor K2 Industrial Services needed a fast turn-around (three days) to complete the project and selected PPG PMC coatings to protect the plants' tanks and pipes.

The carbon steel surfaces of the sludge, clarifiers and processing tanks and pipes – a total of 5,500 sq.ft. – were abrasive-blasted, water-washed and cleaned with hand tools. They then received a coat of Amercoat 370 fast-dry, multi-purpose epoxy and were topcoated with fast-drying surface-tolerant, VOC-compliant epoxy.
