

**Name:** City of Rockford Water Tower  
**Owner:** City of Rockford  
**Location:** Rockford, Illinois, USA  
**Products:** Amercoat 68HS  
PSX 700  
**Date:** Summer of 2004

The city of Rockford is situated about 90 miles west of Chicago, in the beautiful, rolling hills of Northern Illinois. In the summer of 2004, the City hired contractor Kountoupes Painting to paint its 500,000 gallon water tank.

After abrasive-blasting the tank's carbon steel surface, the Kountoupes crew applied to it one coat of PPG PMC's Amercoat 68HS zinc-rich epoxy primer, followed by two coats of PPG's patented PSX 700 engineered siloxane. This coating system will give the water tank superior weather resistance and corrosion control.
