Sinopec Anhui Oil Products Company is a large-scale, state-owned petroleum circulation enterprise, mainly engaged in the distribution, purchase, storage, transportation, operation and management of finished oil.

In 2007, Sinopec awarded to contractor Shanghai Jinhong Construction Company the project to coat its petrochemical ethylene plant in Shanghai. They selected high-performance coatings from PPG Protective and Marine Coatings to protect the steel structure, pipe and equipment – a total of 80,000 square meters.
